

Programozás (Python) és kísérletvezérlés (PSZM17-208) / Computer programming (CCNM17-213)

Nagy Márton, adjunct lecturer

Department of Cognitive Psychology

Email: nagy.marton@ppk.elte.hu

Room: IZU 310

Consulting hours: mostly on Tuesday 9:00-10:00 am but email reservation is necessary!

Course time and place: Preferably blocked classes, 3-4 occasions / semester [Official time and place: Tuesday 13:30-15:00 402]

2019-20/ 2. Semester

Aim of the course:

The aim of the course is to introduce students to the Matlab programming language. The course is for beginners, no previous programming knowledge is needed. We will focus on the basics, from declaring variables to using functions. Later we will use Psychtoolbox to create basic experimental paradigms and save relevant data collected during the experiment.

Grade: homework in pairs: develop an experimental software in Matlab.
